

# Multifunctional Gate Box

## MGBS *Slimline*

**EUCHNER**  
More than safety.

Headquarters in Leinfelden-Echterdingen

Logistics center in Leinfelden-Echterdingen

Production location in Unterböhringen

## Internationally successful – the EUCHNER company

EUCHNER GmbH + Co. KG is a world-leading company in the area of industrial safety technology. EUCHNER has been developing and producing high-quality switching systems for mechanical and systems engineering for more than 60 years.

The medium-sized family-operated company based in Leinfelden, Germany, employs around 800 people around the world.

18 subsidiaries and other sales partners in Germany and abroad work for our international success on the market.

## Quality and innovation – the EUCHNER products

A look into the past shows EUCHNER to be a company with a great inventive spirit. We take the technological and ecological challenges of the future as an incentive for extraordinary product developments.

EUCHNER safety switches monitor safety doors on machines and installations, help to minimize dangers and risks and thereby reliably protect people and processes. Today, our products range from electromechanical and electronic components to intelligent integrated safety solutions. Safety for people, machines and products is one of our dominant themes.

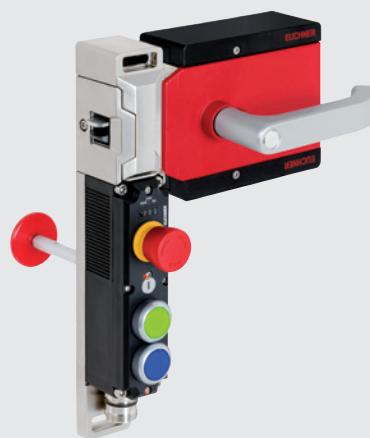

We define future safety technology with the highest quality standards and reliable technology. Extraordinary solutions ensure the great satisfaction of our customers. The product ranges are subdivided as follows:

- ▶ Transponder-coded Safety Switches
- ▶ Transponder-coded Safety Switches with guard locking
- ▶ Multifunctional Gate Box MGB
- ▶ Access management systems (Electronic-Key-System EKS)
- ▶ Electromechanical Safety Switches
- ▶ Magnetically coded Safety Switches
- ▶ Enabling Switches
- ▶ Safety Relays
- ▶ Emergency Stop Devices
- ▶ Hand-Held Pendant Stations and Handwheels
- ▶ Safety Switches with AS-Interface
- ▶ Joystick Switches
- ▶ Position Switches

## The slimline safety door protection device MGBS

- Transponder-coded safety switch, door handle and end stop in one
- Space-saving design
- Handle module for intuitive operation

### Multifunctional Gate Box MGBS

This is the ideal solution wherever a slimline switch housing is advantageous, such as on safety fence corner posts.

Concealed mounting holes in the handle module and other modules provide excellent protection against tampering. A lockout mechanism is included in the handle module. This prevents the installation from starting, e.g. during maintenance and cleaning work. A simple plug connection reduces wiring work.

The system is optionally available with an emergency stop device and with controls and indicators. The resulting MGBS is a slimline safety door protection device with the properties of an MGB.

Thanks to the transponder technology, the system achieves category 4 / PL e according to EN ISO 13849-1 without additional fault exclusion. The MGBS complies with all the requirements of EN ISO 14119. A locking force of 3,900 N is achieved with locking modules. In addition, the degrees of protection IP65, IP67 and IP69K make the MGBS an all-rounder for demanding environments.

### System family AP

**AP** The system family AP is intended to be used for separate operation. The devices are particularly suitable for the connection of safety evaluation units and safety control systems that require short test pulses.

The AP devices generate test pulses on the safety outputs for short circuit monitoring. Due to the little wiring work, AP devices represent a low-cost solution.

### System family AR

**AR** In the AR version up to 20 devices belonging to the AR system family can be connected in series. The AR devices generate test pulses on the safety outputs for short circuit monitoring.

With this device, safety and status signals are collected together in the field and forwarded to the control system.

## System components at a glance

### Locking module MGBS – guard locking for the protection of persons and processes

The MGBS locking module is available in different versions for process protection guard locking or personnel protection guard locking. It can be mounted on left- or right-hinged doors and on sliding doors.

The system is optionally available with an emergency stop device and with controls and indicators. The resulting MGBS is a slimline safety door protection device with the properties of an MGB.

### Interlocking module MGBS

The MGBS is also available as an interlocking module (without guard locking).

#### Individual MGBS module

Without escape release

With escape release

### Handle module MGBS

The handle module is available for doors hinged on the right or for doors hinged on the left.

The bolt tongue of the handle module is reliably detected by a transponder as soon as it is fully inserted into the locking module or interlocking module. For cleaning and service on the machine, the bolt tongue can be locked with max. 3 padlocks using the automatically extending lockout mechanism. The MGBS additionally features a robust door handle that can be rotated in 90° steps. As an alternative to the door handle, the handle module can also be equipped or retrofitted with a door knob.

#### Handle module MGBS

### Inner door handle

In combination with a locking module with escape release, the safety system must be equipped with an inner door handle. It enables people shut in to open the locked door from the danger zone.

#### Inner door handle

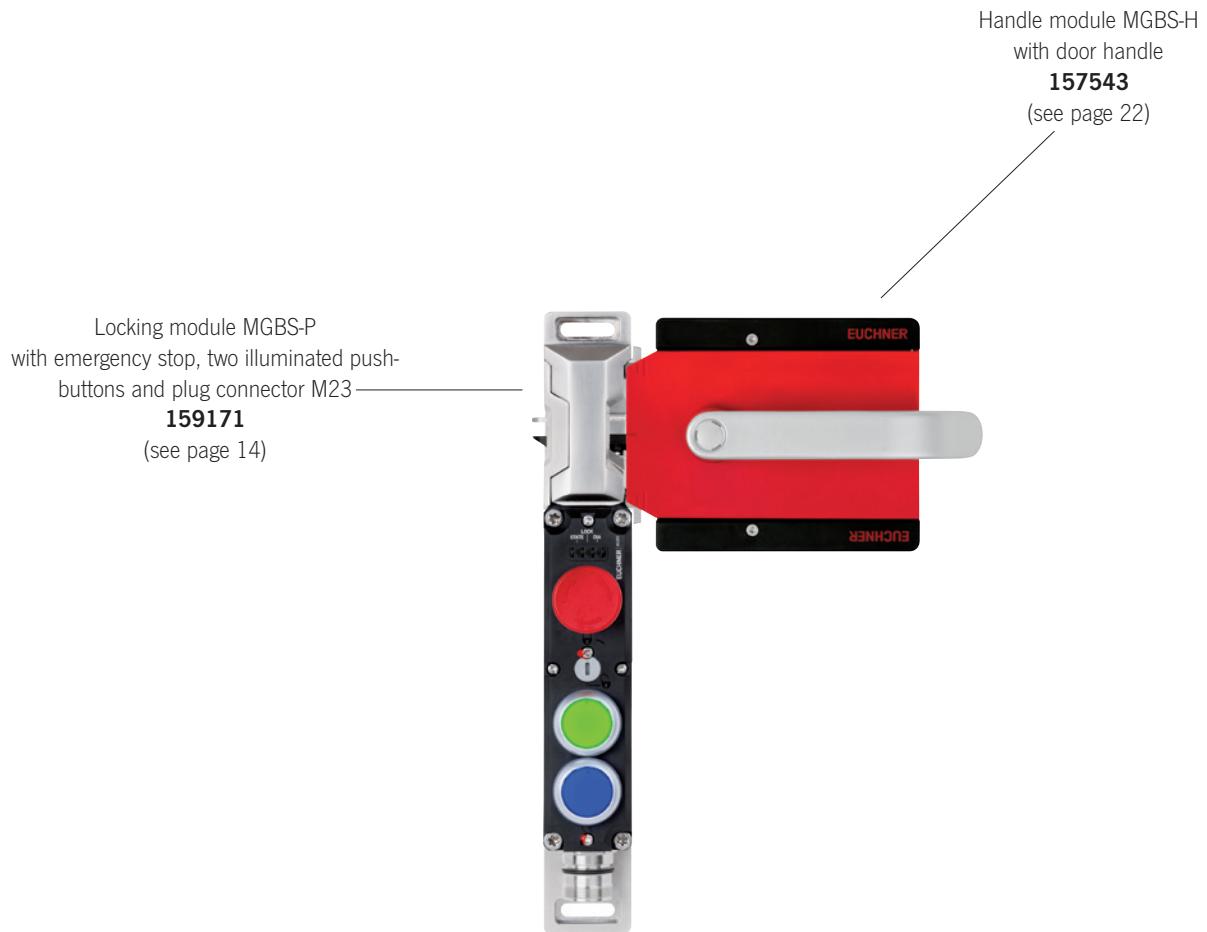

### Escape release

In combination with an interlocking module, the safety system can be equipped with an MGB-E-A... escape release. This feature makes it possible to open the locked door from the danger zone.

#### Escape release MGB-E-A...

## Example for the combination of the MGBS

## »Maximum safety in the smallest possible space.«

---

- ▶ Suitable for tight spaces, e.g. for corner solutions
- ▶ Several functions in one solution: door handle, switch, door stop
- ▶ Optionally with emergency stop, controls and indicators
- ▶ Optionally with escape release
- ▶ Category 4 / PL e according to EN ISO 13849-1

# MGBS

With guard locking

**Locking module**

**Handle module**

**Inner door handle**

With interlocking without guard locking

**Interlocking module**

**Handle module**

**Escape release**

**Locking modules MGBS-P-L.-AP-....**

- ▶ Locking module for the protection of persons or processes (order handle module separately)
- ▶ Optionally with control elements, emergency stop and escape release
- ▶ Door stop can be changed to right/left
- ▶ Category 4 / PL e for the evaluation of all safety functions

**Details****Available coding options**

- ▶ Unicode evaluation

**Guard locking types****L1 Closed-circuit current principle**

Guard locking by spring force.  
Release by applying voltage to the guard locking solenoid.

**L2 Open-circuit current principle**

Guard locking by solenoid force.  
Activation of the guard locking by applying voltage to the guard locking solenoid.

**Auxiliary release**

Included with all versions as standard.

**Door stop**

On the locking modules, the door stop can be changed from right to left and vice versa at any time with little effort.

**Escape release (optional)**

Some devices have an escape release.  
The escape release can be extended with the aid of the support brackets supplied.

**Handle modules MGBS-H-...**

- ▶ Intelligent bolt tongue with transponder
- ▶ Automatically extending lockout mechanism
- ▶ Door handle or door knob silver colored

**Details****Bolt tongue**

The bolt tongue is reliably detected by the transponder as soon as it is inserted in the interlocking/locking module.

**Lockout mechanism (automatically extending)**

For cleaning and service on the machine, the bolt tongue can be locked with max. 3 padlocks using the automatically extending lockout mechanism. In this way the operation of the handle is prevented in the locked state.

**Door handle**

The MGBS has a robust door handle that can be rotated in 90° steps to suit all installations. The handle rotating direction is simple to adjust.

**Door knob**

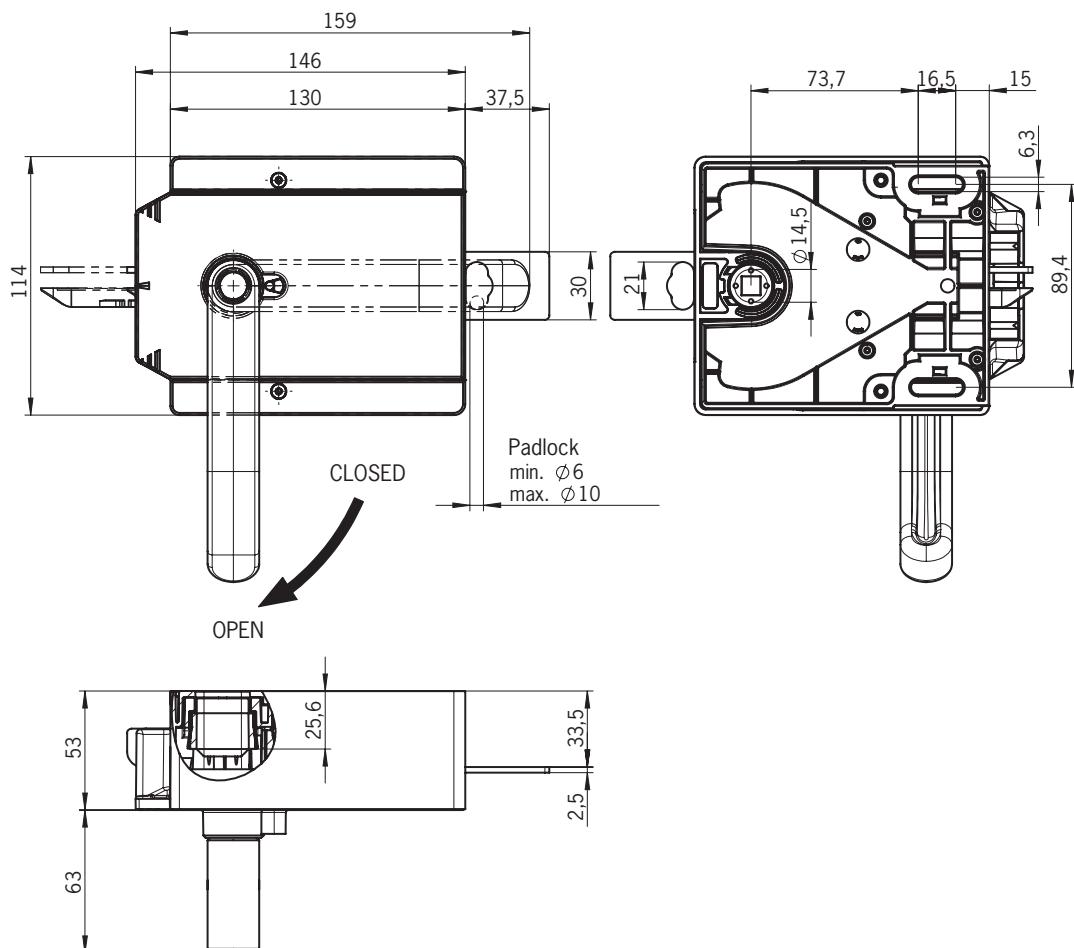

As an alternative to the door handle, the handle module can also be equipped or retrofitted with a door knob.

## Inner door handle AE-R-S1

- ▶ Only use in combination with locking module MGBS-P-L. with escape release
- ▶ Inner door handle silver colored
- ▶ A sticker describing the opening sequence is included with the locking module
- ▶ Extended actuation axis for thicker doors (order separately)

### Details

#### Inner door handle

In combination with a locking module with escape release, the safety system must be equipped with an inner door handle. It enables people shut in to open the locked door from the danger zone. The actuating direction automatically adapts to the actuating direction of the handle module and does not need to be changed.

The actuation axis supplied is suitable for profiles up to 40 mm.

#### Door knob

As an alternative to the door handle, the handle module can also be equipped or retrofitted with a door knob.

#### Extended actuation axis

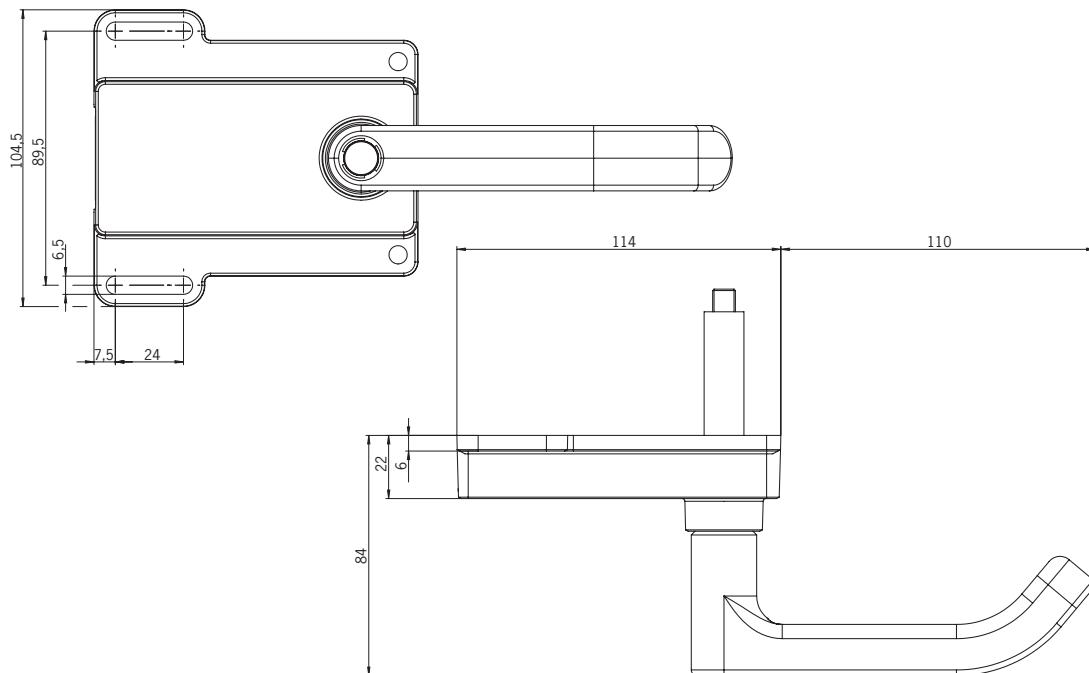

Optionally, a 250 mm (instead of 107 mm) long actuation axis 106761 can be ordered for thicker doors or profiles > 40 mm. The axis can be shortened to the required dimension.

#### Further information

- ▶ Dimension drawings see p. 25
- ▶ Accessories and spare parts see p. 36
- ▶ For detailed information, enter the order number for the product in the search box at [www.euchner.com](http://www.euchner.com).

### Dimension drawing

**Accessories**

“Exploit all the advantages –  
with well thought-out  
original accessories from  
**EUCHNER.**”

---

- ▶ Connection material – connect safely and easily; no long search for cables and plug connectors.
- ▶ Fixing material – secure and easy mounting for many installation situations.
