Electronic-Key-System EKS USB Drivers Update History

The technical state of the EKS USB drivers software is characterized through the description
Version X.X.X.0

▶ Order no. 094 376

Version 1.0.1.0 - May 2004

▶ First state released for sales. To support operating systems...
Windows® 2000 (32-bit)
Windows® XP (32-bit)
Windows® Server 2003 (32-bit)

Version 1.0.3.0 - July 2006

▶ To support new EKS ActiveX® module software (order no. 098 708).

Version 1.1.0.0 - November 2008

▶ To support additional operating systems...
Windows® XP (64-bit)
Windows® Server 2003 (64-bit)
Windows® Vista (32-bit)
Windows® Vista (64-bit)
Windows® Server 2008 (32-bit)
Windows® Server 2008 (64-bit)

▶ Various bug fixes implemented.

Version 1.2.0.0 - January 2010

▶ To support additional operating systems...
Windows® 7 (32-bit)

▶ Various bug fixes implemented.

Version 1.3.0.0 - January 2011

▶ To support additional operating systems...
Windows® 7 (64-bit)
Windows® Server 2008 R2 (64-bit)

▶ Various bug fixes implemented.

Version 1.4.0.0 - February 2014

▶ To support additional operating systems...
Windows® 8 (32-bit)
Windows® 8 (64-bit)
Windows® 8.1 (32-bit)
Windows® 8.1 (64-bit)

Remark!
The EKS USB drivers do not have an approved Windows® signature from Microsoft WHQL. Above mentioned 64-bit operating system versions may require digitally signed driver software during the installation process. If necessary, please disable driver signature verification on Windows® during installation.

▶ Various bug fixes implemented.

Version 1.5.0.0 - April 2017

▶ Support of some previous operating systems discontinued. If drivers for such operating systems are needed, please contact the EUCHNER technical support department. With the latest driver version, the following operation systems are supported:

Windows® 7 (32-bit)
Windows® 7 (64-bit)
Windows® 8 (32-bit)
Windows® 8 (64-bit)
Windows® 8.1 (32-bit)
Windows® 8.1 (64-bit)
Windows® 10 (32-bit)
Windows® 10 (64-bit)
Windows® Server 2008 R2
Windows® Server 2012 R2
Windows® Server 2016

Remark!
The EKS USB drivers do not have an approved Windows® signature from Microsoft WHQL. However, this driver version is self-signed, which means that during installation it only may be required to approve that software from EUCHNER GmbH + Co. KG can be trusted.

Version 1.6.0.0 - July 2019

▶ The EKS USB drivers have an approved Windows® signature from Microsoft WHQL. With these drivers, it should be possible (provided that, the user have an internet connection and administrator rights) that drivers install by itself over the Windows® update routine.
▶ Introduction of setup.exe files which lead through the installation by an installation wizard
▶ If it is not possible to install the drivers automatically over the Windows® update routine, the drivers can be installed by executing appropriate the setup.exe file. Both drivers will be installed simultaneously.
▶ To install the EKS USB drivers it is necessary to identify the architecture (32-bit or 64-bit) of the operating system. The EKS USB drivers folder contains two installation folders for the relevant operating system.
▶ Introduction of silent installer package.

Version 1.6.0.0 - April 2024

▶ To support additional operating systems...
Windows® 11
